

RoadTrip® T4 In-motion Automatic Satellite TV Antenna

Winegard is excited to announce the launch of the new RoadTrip® T4 In-motion Automatic Antenna that works with DISH®, DIRECTV® and Bell TV™ programming.

Versatile - The RoadTrip T4 receives DISH, DIRECTV, or Bell TV programming for the ultimate in provider versatility.

Ultra Small - This sleek, compact unit is ultra lightweight, with the smallest footprint, requiring minimal roof space. Perfect for the on-the-go lifestyle!

Simple to Use - Easy one-button operation, 100% automatic with full in-motion tracking capability.

Quietest System with Improved Tracking and Durability - New motors and updated tracking algorithms reduce noise levels and improve tracking capabilities for quicker recovery when losses occur behind trees, bridges, etc.

Features and Benefits

Versatile

- Receives either DISH, DIRECTV or Bell TV for maximum provider versatility
- **1 TV** (one receiver)
 - Points to either satellites 110°, 119° or 129° (DISH), 101° or 119° (DIRECTV), or 91° or 82° (Bell TV)
 - Channel changes will prompt antenna to point to required orbital
- **2 TVs** (a receiver on each TV)
 - The system has two coaxial outputs to allow for two-receiver or dual-tuner DVR usage
 - Points to either 110°, 119° or 129° (DISH), 101° or 119° (DIRECTV), or 91° or 82° (Bell TV)

Ultra Small Antenna

- Dimensions: 14.3" diameter, 13.5" height
- Weight: 10 pounds
- Powered via power cable

Fast Setup

- **Fully-automatic**
 - Automatically finds satellite orbital locations
 - Compact size requires less acquisition time

Quality

- **Winegard RoadTrip T4 has a 2 year warranty**
 - Backed by Winegard's two year parts, one year labor guarantee.

FAQS

PROGRAMMING

Q. What satellite providers and satellites work with the RoadTrip T4 antenna?

A: The RoadTrip T4 antenna is compatible with the following:
DIRECTV® - 101°, 119°, DISH® - 110°, 119°, 129°, Bell TV™ - 82°, 91°.

Q. Can I get HD service with the RoadTrip T4 antenna?

A: HD programming is available with DISH and Bell TV. Keep in mind that in order to receive HD programming, you must have an HDTV as well as an activated HD receiver with an HD programming package (sold separately).

Q. Is the RoadTrip T4 antenna compatible with Shaw Direct service in Canada?

A: No, the RoadTrip T4 antenna is not compatible with Shaw Direct.

Q. I have cable at home and don't want to switch or pay for satellite programming all year when I will only need it for a few months. What are my options?

A: DISH offers pay-as-you-go programming. There are no contracts and no commitments—simply pay for the months you would like satellite television service. Call 1-800-288-8094 to sign-up or visit www.winegard.com/dishnetwork for more information.

Q. Where can I get a receiver and programming?

A: For receivers and programming, call 1-866-609-9374 or visit www.winegard.com/receivers.

Q. Will I be able to watch Bell TV in the United States with the RoadTrip T4 antenna?

A: The RoadTrip T4 antenna will work in areas where Bell TV provides a signal. Bell TV has recently significantly reduced signal coverage in the United States, and viewing outside of Canada will be extremely limited.

Q. Will my DIRECTV/DISH service work outside of the continental United States?

A: Generally, coverage is limited to the continental United States. Coverage may be available outside of the United States but will be limited.

GENERAL FEATURES

Q. Does the RoadTrip T4 automatically toggle between satellites?

A: Yes. As you change the channel, the RoadTrip T4 antenna will automatically toggle to the corresponding satellite.

Q. How many receivers can I hook up to the RoadTrip T4 antenna?

A: The RoadTrip T4 antenna has two satellite outputs. Two single-tuner receivers can be hooked up to the antenna, or one DVR (dual-tuner) receiver can be hooked up to the antenna.

Q. If I hook up two TVs to the antenna, can I watch any program on either TV?

A: You can watch any program on either TV as long as the programs are on the same satellite.

Q. Does Winegard Company recommend using a DVR with the RoadTrip T4 antenna?

A: DISH and DIRECTV do not recommend using receivers with internal hard drives in a mobile environment prone to excessive vibration or heat. For this reason, Winegard recommends a single tuner receiver.

Q. Does the RoadTrip T4 antenna work with a DVR?

A: Yes, the RoadTrip T4 antenna can be set up to work with most DVR receivers. Two coaxial cables will need to run from the RoadTrip T4 antenna to the DVR, and the receiver will only be able to watch or record from one satellite at a time, which may limit some DVR functionality. The RoadTrip T4 antenna is not compatible with the Hopper/Joey for DISH. The RoadTrip T4 antenna is not compatible with H25, HR34, or HR44 for DIRECTV (unless the SWM-840 accessory kit is added).

SETUP

Q. Does the RoadTrip T4 antenna need to be perfectly level?

A: No. However, the antenna may take longer to lock onto signal if the antenna is not level.

Q. Do I need to go through all receiver setup steps every time I use the antenna?

A: As long as the receiver configuration has not been altered since last usage, no re-configuration is necessary. If the configuration has been changed by connecting the receiver to a different antenna, re-configuration may be necessary and instructions can be found in the user guide or online at www.winegard.com/receivers/setupguide.php

Q. What do I need to set up the RoadTrip T4 antenna?

A: You will need a TV, an activated receiver with programming package, and a 12V power source for the RoadTrip T4 antenna.

Q. What happens if the RoadTrip T4 antenna stops working or if I can't set up the antenna properly?

A: Contact Winegard Technical Services by emailing help@winegard.com or by calling 1-800-788-4417.
